PROFESSIONAL SUMMARY

Analytical BSc Computer Science & Physics Candidate | Software & Web Developer

Results-driven final-year BSc student at the University of Zululand specializing in Computer Science and Physics. Combines strong theoretical foundations in distributed systems, nuclear physics, and solid-state physics with practical experience in full-stack web development and natural language processing. Passionate about building impactful software solutions—such as platforms connecting graduates to career opportunities—and leveraging analytical skills to solve complex technical challenges.

CORE SKILLS & TECHNICAL COMPETENCIES

- **Programming & Systems:** Data Structures & Algorithms, Systems Programming, Distributed Systems Modeling, Web Application Development
- **Networking & Tools:** Cisco Packet Tracer, Network Topology Simulation, Router & Switch Configuration, Network Protocols & Troubleshooting
- **Data & Physics:** Large Language Models (LLM / NLP), isiZulu Corpus Development, Solid State Physics, Nuclear Physics, Electronic Circuits
- **Soft Skills:** Technical Writing, Effective Communication, Problem Solving, Team Collaboration, Continuous Learning

EDUCATION

Bachelor of Science (Augmented) in Computer Science & Physics | University of Zululand

Expected Graduation: 2026 / Present

Key Modules: Final-Year Project, Distributed Systems Modeling, Solid State Physics, Nuclear Physics, Advanced Programming, Quantum & Statistical Physics

National Senior Certificate (NSC) | Emachobeni Secondary School

Graduated: 2022

PROJECTS & RELEVANT EXPERIENCE

GraduateLink SA | Lead Developer (In Development)

- Architecting and developing a dedicated web application designed to connect final-year students and graduates with employment and internship opportunities.
- Implementing responsive UI/UX and backend functionality to streamline job matching and career accessibility.

isiZulu NLP & Corpus Development | Developer / Researcher

- Built a specialized isiZulu linguistic corpus to support natural language processing (NLP) models and regional language technologies.
- Preprocessed, structured, and validated text datasets for computational analysis.

Large Language Model (LLM) Integration Project | Developer

- Designed, implemented, and tested an NLP model pipeline utilizing Large Language Model architectures.
- Applied advanced programming techniques to optimize model outputs and validate execution accuracy.

Network Simulation & Routing Project | Cisco Packet Tracer Specialist

- Simulated and deployed complex network topologies using Cisco Packet Tracer.

- Configured routers and switches while troubleshooting connection issues and ensuring protocol compliance.

LANGUAGES

isiZulu: Native | **English:** Professional Working Proficiency
